8. Gross sales, value, and average price by type, state, and market	14-15
9. Resales, average price, and percentage of gross sales by type, state, and market	16-17
10. Rank of markets by volume of producers' sales, by separate types and by all types, 1985 crop	18
11. Season average prices and support rates by individual grades, per 100 pounds	19-21
12. Average prices by weeks for representative grades and season averages—Type 11	22-23
13. Average prices by weeks for representative grades and season averages—Type 12	24-25
14. Average prices by weeks for representative grades and season averages—Type 13	26-27
15. Average prices by weeks for representative grades and season averages—Type 14	28
16. Warehouse charges by states, 1985 crop	29
17. Average weight per lot, 1980-85 crops	29
18. Tobacco received by the Stabilization Corporation, 1982-85 crops	29
19. Percentage distribution by groups and types, 1981-85 crops	30
20. Percentage distribution by qualities and types, 1981-85 crops	30
21. Percentage distribution by colors and types, 1981-85 crops	31
22. Percentage distribution by groups, qualities, and colors for types 11-14, 1981-85 crops . .	31
23. Percentage distribution by grades and types, 1985 crop	32-33
24. Percentage breakdown of marketings by selected groupings, 1985 and 1984 crops	33
25. Percentage distribution by grades for all types, 1983-85 crops	34-35
26. Average price by grade groups and types, 1985-84 crops	35

Review of the 1985 Marketing Season

A decline in quota and a lower price support highlighted the 1985 flue-cured tobacco season. An approximate eight percent drop in effective quota was experienced along with a nearly five cent drop in the "official" price support level. This still saw a relatively high percentage of sales placed under loan. A heavy assessment was charged to growers to bolster the "no net cost" program while rebates and discounted prices were offered to buyers in an effort to lower the "effective" support level and stimulate both domestic purchases and exports. The Secretary of Agriculture authorized a program whereby buyers received an immediate rebate of 10 cents per pound and an additional 15 cents per pound if specific "triggers" were met. These conditions were: companies must purchase 650 million pounds of the 1985 crop, and then buy an additional 125 million pounds (dry weight) from Stabilization stocks at reduced prices. Tobacco purchased from Stabilization was to be on the basis of two pounds from the 1982-1984 crops for one pound of the 1976-1981 crops. The first trigger was met October 23 with the second level reached December 23, 1985. This effectively lowered the support price from \$1.699 per pound in 1984 to \$1.40 per pound for 1985. Funds were to come from the 25 cents assessment fee. If tobacco was placed under loan, the Stabilization Corporation received the full 25 cent assessment. Growing conditions varied widely with some areas of North Carolina and Virginia experiencing near drought conditions early in the season. Rain fell later, especially in the old belt, but much of Eastern North Carolina suffered dry conditions throughout the season. Overall maturity of the crop was the best since 1976.

Sales and averages. Producers were paid an average price of \$172.01 per hundred for the 1985 crop of flue-cured tobacco. This was a drop of \$9.06 from the 1984 average of \$181.07. These averages do not reflect assessments paid by growers nor rebates paid to buyers. The "no net cost" assessment was 7 cents per pound in 1984 and 25 cents in 1985, meaning the producers' average after assessments for 1985 of \$147.01 was down \$27.06 from the 1984 after assessment figure of \$174.07. Net sales at auction totaled 786,357,542 pounds or 7.0 percent below last season. Net value at auction of \$1,352.6 million was down \$178.5 million or 11.7 percent.

Grade averages. Almost all grade averages were down from 1984 levels, as expected due to the decline in support prices. Leaf grades were down \$4 to \$8 with cutters and better quality lugs off \$5 to \$6 per hundred. Lower quality lugs along with primings declined mainly \$7 to \$11, and nondescript losses ranged from \$3 to \$10 per hundred pounds. The practical top price this season was \$196 after three years at \$205 per hundred. Averages by grades and market averages shown in this review do not reflect rebates to buyers or assessments to growers.

Composition of offerings. A substantial improvement in maturity was shown for the 1985 flue-cured crop. Mature to mellow tobacco increased 6.7 percentage points to 53.9 while unripe variegated grades declined 10.6 points to 36.5 percent. Type 11 at 65.5 percent and Type 13 at 56.8 percent were the only belts with over 50 percent mature to mellow. Dry weather contributed

to Type 12 having the lowest percentage of mature to mellow tobacco this season. Approximate percentages by group were: leaf 57; smoking leaf 2; cutters 9; lugs 16; primings 10; and nondescript 4 percent of sales. On the negative side, only 8 percent graded good quality or better with 55 percent fair, 29 percent low, and 3 percent poor quality. The three heaviest volume grades and their percentages were: B4K (11.0); B5K (10.0); and B4KM (8.6). Completing the top ten were: X4KM (4.4); P4F (4.3); B4KR (3.8); C4KM(3.6); B5KM (3.3); B4KF (3.3); and B5KF (2.9). These ten grades accounted for 55.2 percent of all 1985 auctions.

Loan rates. Loan rates by grades for 1985 reflected an average support level of \$1.65 per pound, down from the 1984 figure of \$1.699. This was the first change in this figure since the 1982 crop. The 25 cent rebate to buyers effectively lowered the support level to \$1.40 per pound.

Stabilization receipts. Less of the 1985 crop sold at auction was placed under loan. A total of 131.6 million pounds was delivered to the Cooperative representing 16.7 percent of net sales. This compares to 158.6 million or 18.8 percent in 1984. Percentages of loan receipts by group follow:

Group	1985	1984
Leaf (B)	31.0	37.4
Smoking leaf (H)	1.7	0.8
Cutters (C)	30.2	33.5
Lugs (X)	31.8	25.6
Primings (P)	5.2	2.6
Mixed (M)	*	*
Nondescript (N)	0.1	0.1

*Less than one-tenth of one percent.

Marketing regulations. Auction selling schedules continued to be regulated by the grower designation plan first used in 1974. However, several significant changes in other marketing areas were made in 1985. When legislation to reduce support prices and implement a buy out of Stabilization stocks was not passed, the Secretary of Agriculture used his administrative authority to reduce the average support level to \$1.65 per pound and raise the "no net cost" assessment from 7 cents to 25 cents per pound. A penalty of 75 percent of the previous year's average market price was imposed on producers that did not contribute to the "no net cost" account, in addition to losing price support eligibility. Growers also had to certify they had not used DDT, TDE, Endrin, or Toxaphene on their tobacco, and that they had not planted a discount variety. Warehouse operators were to mark "no price support" on producers' tobacco not eligible for support. The user fee for grading services of the Tobacco Division, USDA, remained at 55 cents per hundred pounds and the Stabilization Corporation continued to deduct 1 cent per pound from the support level for overhead costs.

Preliminary 1986 quota. The 1986 basic national marketing quota for flue-cured tobacco was set at 757 million pounds by the Secretary of Agriculture in December, 1985. This was down about two percent from the 1985 basic figure. The reduction was the maximum allowed by law and may be revised if the new tobacco legislation under consideration is enacted. Overmarketings are estimated to exceed undermarketings by 35 million pounds, making the 1986 effective quota 722 million pounds -- 36 million below the 1985 effective figure of 758 million pounds.

SUMMARY OF STANDARD FLUE-CURED TOBACCO GRADES 1/

Key to standard grademarks for flue-cured tobacco

<u>Groups</u>	<u>Qualities</u>	<u>Color symbols</u>	<u>Combination symbols</u>
A - Wrappers	1 - Choice	L - Lemon	KL - Variegated lemon
B - Leaf	2 - Fine	LL - Whitish-lemon	KF - Variegated orange
H - Smoking leaf	3 - Good	F - Orange	KD - Variegated dark red
C - Cutters	4 - Fair	FR - Orange red	KV - Variegated greenish
X - Lugs	5 - Low	R - Red	KM - Variegated mixed
P - Primings	6 - Poor	K - Variegated	G - Green
M - Mixed		KR - Variegated red or scorched	GR - Green red
N - Nondescript		V - Greenish	GK - Green variegated
S - Scrap			GG - Gray green
<u>Special factor</u>		<u>Special symbol</u>	
	W - Wet	S - Slick	LP - Lemon (primings side)
	U - Unsound		PP - Orange (primings side)
	Sand or Dirt		

Special factors "sand" or "dirt" may be applied to all priming grades and to first quality nondescript from the priming side.

Individual flue-cured grades

1/ Tobacco not covered by the standard grades is designated "No-G", "No-G-F" or "No-G-Nested"

1/ Averages based on auction sales. Averages are shown in parentheses when at least 10 but less than 20 lots were recorded. Dashes indicate that less than 10 lots were recorded.

2/ For key to standard trademarks see brief of classification on page 5.

3/ Commodity Credit Corporation loans made available through the Flue-cured Cooperative Stabilization Corporation, Raleigh, N.C.

4/ Includes No-G, No-G-F and scrap (S).

1/ No averages shown after September 26 due to limited sales.

Dashes indicate that less than 20 lots were recorded for the week.

Table 16.—Warehouse charges by states, 1985 crop

State	Type	Auction fee <u>1/</u>	Commission on gross sales <u>1/</u>	Additional charges
			<u>Percent</u>	
Florida	14	15 cents on all piles of 100 pounds or less	2-1/2	Weighing and handling 10 cents per pile on all piles of 100 pounds or less, and 10 cents for each additional 100 pounds.
Georgia	14		2-1/2	
North Carolina	11-13	and 25 cents on all piles over 100 pounds	2-1/2	
South Carolina	13		2-1/2	
Virginia	11	25 cents per pile	2-1/2	Weighing, 10 cents per 100 pounds.

1/ Maximum permitted under State law.
